CYBER SECURITY AND NETWORK MANAGEMENT

VOLUME 1 NO 1 FEBRUARY 2026

JOURNAL FOCUS AND SCOPE

Cyber Security and Network Management is a peer-reviewed academic journal that focuses on research and practical innovations in cybersecurity and network management to protect digital infrastructures and ensure secure, resilient, and reliable networked systems, encompassing topics such as network security and cyber defense mechanisms, intrusion detection and prevention systems, cryptography and blockchain security, cloud, IoT, and edge security, network monitoring and performance management, cyber risk assessment and governance, as well as digital forensics and incident response. The journal is published in February, May, August, and November.

Articles published in *Cyber Security and Network Management* comprise original scientific research findings (top priority), novel scientific review articles (lower priority), and commentaries or critiques regarding existing publications. The journal accepts manuscripts and articles in the fields of network security and cyber defense mechanisms, intrusion detection and prevention systems, and cryptography and security.

Articles featured in *Cyber Security and Network Management* have undergone a peer-review process. The journal accepts only original research findings (top priority) and novel scientific review articles (lower priority). The decision regarding the acceptance of a scientific article rests with the Editorial Board, based on recommendations from peer reviewers.

INFORMASI INDEKSASI JURNAL

Cyber Security and Network Management (E-ISSN: 3124-0054; https://journal.apjikom.or.id/index.php/CYBERNet) is a peer-reviewed journal slated for indexing in several reputable databases, including Google Scholar, Garda Rujukan Digital (GARUDA), Copernicus, Dimensions, ORCID (Connecting Research and Researchers), and DOI Crossref.

CYBER SECURITY AND NETWORK MANAGEMENT

VOLUME 1 NO 1 FEBRUARY 2026

PREFACE

Cyber Security and Network Management is a peer-reviewed academic journal that focuses on research and practical innovations in cybersecurity and network management to protect digital infrastructures and ensure secure, resilient, and reliable networked systems, encompassing topics such as network security and cyber defense mechanisms, intrusion detection and prevention systems, cryptography and blockchain security, cloud, IoT, and edge security, network monitoring and performance management, cyber risk assessment and governance, as well as digital forensics and incident response. The journal is published in February, May, August, and November.

Reviewers evaluate submissions based on originality, clarity of presentation, and contribution to the field or body of knowledge. This journal publishes research articles, review articles (including literature reviews), case reports, and concept or policy articles covering areas such as network security and cyber defense mechanisms, intrusion detection and prevention systems, and cryptography and security. Submitted articles must be original works that have not been previously published. All submissions undergo review by a team comprising both internal and external reviewers.

The Editorial Board is committed to continuously enhancing the journal's quality so that it may serve as a significant reference in the advancement of the field. We extend our deepest appreciation and gratitude to the peer reviewers, Editorial Board members, and all parties involved in the publication of this journal.

Sincerely,

Editor-in-Chief

CYBER SECURITY AND NETWORK MANAGEMENT

VOLUME 1 NO 1 FEBRUARY 2026

LIST OF CONTENTS

Journal Focus, Scope, and Indexing Information I
Editorial Team II
Foreword III
List of contents IV

Design and Evaluation of an Adaptive Intrusion Detection Framework for IoT Edge Networks Using Hybrid Machine Learning and Deep Reinforcement Learning Techniques **Hal 01-11**
Victor Marudut Mulia Siregar, Munji Hanafi

A Comprehensive Study on Blockchain Based Cryptographic Key Management and Secure Communication Protocols for Large Scale Cyber Physical Systems in Industrial Environments **Hal 12-22**
Rudolf Sinaga, Lely Priska D Tampubolon

Risk Aware Cybersecurity Governance Model with Real Time Threat Intelligence Integration and Predictive Anomaly Detection for Enterprise Network Infrastructures **Hal 23-33**
Firman Pratama, Fandan Dwi Nugroho Wicaksono

Secure Cloud Native Microservices Architecture with Zero Trust Network Access Controls and Multi Layered Encryption for Resilient Distributed Systems **Hal 34-44**
Lukman Medriavin Silalahi, Imelda Uli Vistalina Simanjuntak, Hayadi Hamuda, Irfan Kampono, Agus Dendi Rochendi, Abdul Hamid

Digital Forensics and Automated Incident Response Framework Leveraging Big Data Analytics and Real Time Network Traffic Profiling in Heterogeneous Cyber Environments **Hal 45-55**
Danang Danang, Universitas Sains dan Teknologi Komputer, Indonesia
Zaenal Mustofa, Universitas Negri Yogyakarta , Indonesia
Irlon Irlon, Institut Teknologi Budi Utomo , Indonesia
