INTELLIGENT SYSTEMS AND ROBOTICS

VOLUME 1 NO 1 FEBRUARY 2026

JOURNAL FOCUS AND SCOPE

Intelligent Systems and Robotics is a peer-reviewed academic journal that publishes original research on intelligent systems and robotic technologies incorporating artificial intelligence to enable autonomous, adaptive, and interactive computing solutions, encompassing topics such as artificial intelligence and machine learning, deep learning and neural networks, autonomous and intelligent robotic systems, computer vision and sensor fusion, human–robot interaction, intelligent embedded and cyber-physical systems, and AI-driven automation and smart robotics. The journal is published in February, May, August, and November**.**

Intelligent Systems and Robotics publishes original scientific research findings (top priority), novel scientific review articles (lower priority), and commentaries or critiques regarding previously published work. The journal accepts manuscripts and articles in the fields of AI and intelligent robotics.

Articles published in Intelligent Systems and Robotics have undergone a peer-review process. The journal accepts only original research findings (top priority) and novel scientific review articles (lower priority). The decision to accept or reject a manuscript rests with the Editorial Board, based on recommendations from peer reviewers.

JOURNAL INDEXING INFORMATION

Intelligent Systems and Robotics (E-ISSN: 3123-9803; https://journal.apjikom.or.id/index.php/ISR) is a peer-reviewed journal slated for indexing in several reputable databases, including Google Scholar, Garda Rujukan Digital (GARUDA), Copernicus, Dimensions, ORCID (Connecting Research and Researchers), and DOI Crossref..

INTELLIGENT SYSTEMS AND ROBOTICS

VOLUME 1 NO 1 FEBRUARY 2026

Editor in Chief

Prof. Dr. Kristoko Dwi Hartomo, S. Kom., M. Kom, Universitas Kristen Satya Wacana, Indonesia

Editorial Boards

Zi-Yi Lim, Ph.D, Chaoyang University of Technology, Taiwan
Assoc. Prof. Dr. Taraknath Paul, Brainwave University Kolkata, India
Assoc. Prof. Jaime Soares, Instituto Profissional de Canossa, Timor Leste
Agung Budi Prasetio, Ph.D, Institut Teknologi Tangerang Selatan, Indonesia
Dr. Imam Ahmad Ashari, M.Kom, Universitas Harapan Bangsa, Indonesia

Reviewers-Team

Eko Aziz Apriadi, S.T., M.Kom., Universitas Indonesia Mandiri, Indonesia
Gloria Virginia, S.Kom., MAI., Ph.D, Universitas Kristen Duta Wacana, Indonesia
Dr. Emy Setianingsih, Universitas AKPRIND Indonesia, Indonesia
I Made Agus Oka Gunawan, M.Kom, Politeknik Negeri Bali, Indonesia
M. Bucci Ryando, M.Kom, Institut Teknologi dan Bisnis Bina Sarana Global, Indonesia
Institut Teknologi dan Bisnis Bina Sarana Global, Indonesia, Universitas Kristen Satya Wacana, Indonesia

INTELLIGENT SYSTEMS AND ROBOTICS

VOLUME 1 NO 1 FEBRUARY 2026

FOREWORD

Intelligent Systems and Robotics (e-ISSN: 3031-8343; p-ISSN: 3031-8351) is published by the Indonesian Association for Research in Religious Education and Philosophy. The journal aims to focus on the critical study of Islamic Religious Education, covering issues such as strategies, methods, media, learning resources, and evaluation and assessment within the dynamics of learning across various educational levels (elementary, junior secondary, and senior secondary), as well as other topics relevant to the field. The journal is published six times a year (February, April, June, August, October, and December).

Reviewers evaluate submissions based on originality, clarity of presentation, and contribution to the field or body of knowledge. The journal publishes research articles, review articles (literature reviews), case reports, and concept or policy articles in the fields of AI and intelligent robotics. Articles accepted for publication must be original works that have not been previously published. Submitted articles undergo review by a team comprising both internal and external reviewers.

The Editorial Board is committed to continuously improving the journal's quality so that it may serve as a significant reference in the advancement of knowledge. We extend our deepest appreciation and gratitude to the peer reviewers, Editorial Board members, and all parties involved in the publication of this journal.

Regards,

Editor-in-Chief

INTELLIGENT SYSTEMS AND ROBOTICS

VOLUME 1 NO 1 FEBRUARY 2026

LIST OF CONTENTS

Journal Focus, Scope, and Indexing Information I
Editorial Team II
Foreword III
List of contents IV

Design and Implementation of a Deep Reinforcement Learning Framework for Autonomous Navigation in Dynamic Unstructured Robotic Environments with Real Time Obstacle Avoidance **Hal 01-14**
Milli Alfhi Syari, Zira Fatmaira, Syofyan Anwar syahputra

A Hybrid NeuralSymbolic Approach for Human Robot Interaction Enhancement Using Multimodal Sensor Fusion and Context Aware Behavioral Adaptation Techniques **Hal 15-30**
Setyawan Wibisono, Hayadi Hamuda, Encik Yoega Renaldi

Real Time Computer Vision System Based on Convolutional Neural Networks for Precision Object Detection and Tracking in Collaborative Industrial Robot Applications **Hal 31-47**
Anggit Wirasto, Khoirun Nisa, Titi Christiana

Development of an Intelligent Embedded Cyber Physical System Integrating Edge AI and Low Power Sensor Networks for Adaptive Environmental Monitoring and Robotic Control **Hal 48-64**
Hayadi Hamuda, Sarah Anjani, Lailatun Adzimah

Explainable Artificial Intelligence Methods for Autonomous Robot Decision Making: A Multi Agent Framework with Safety Assurance and Ethical Constraint Optimization **Hal 65-81**
Harry Setya Hadi, Nicodemus Rahanra
