PROGRAMMING AND ALGORITHM FUNDAMENTALS

VOLUME 1 NO 1 JANUARY 2026

JOURNAL FOCUS AND SCOPE

Programming and Algorithm Fundamentals is a peer-reviewed academic journal that disseminates fundamental and applied research in programming, algorithm design, and computational problem-solving as the foundation of modern computing systems, covering areas such as algorithm design and complexity analysis, data structures and optimization techniques, programming paradigms and languages, computational thinking, parallel and distributed algorithms, algorithmic foundations of software systems, and studies on programming education and curriculum development. The journal is published in January, April, July, and October.

Articles published in Programming and Algorithm Fundamentals comprise original scientific research findings (top priority), novel scientific review articles (lower priority), and commentaries or critiques regarding existing publications. The journal accepts manuscripts and articles covering fields such as algorithms and complexity analysis, data structures and optimization techniques, programming paradigms and languages, computational thinking, parallel and distributed algorithms, and the algorithmic foundations of software systems.

Articles featured in Programming and Algorithm Fundamentals have undergone a peer-review process. The journal accepts only original research findings (top priority) and novel scientific review articles (lower priority). The decision regarding the acceptance of a scientific article rests with the Editorial Board, based on recommendations provided by peer reviewers.

INFORMASI INDEKSASI JURNAL

Programming and Algorithm Fundamentals (E-ISSN: 3123-979X; https://journal.apjikom.or.id/index.php/PAF) is a peer-reviewed journal slated for indexing in several reputable databases, including Google Scholar, Garda Rujukan Digital (GARUDA), Copernicus, Dimensions, ORCID (Connecting Research and Researchers), and DOI Crossref..

PROGRAMMING AND ALGORITHM FUNDAMENTALS

VOLUME 1 NO 1 JANUARY 2026

PREFACE

Programming and Algorithm Fundamentals is a peer-reviewed academic journal that disseminates fundamental and applied research in programming, algorithm design, and computational problem-solving as the foundation of modern computing systems, covering areas such as algorithm design and complexity analysis, data structures and optimization techniques, programming paradigms and languages, computational thinking, parallel and distributed algorithms, algorithmic foundations of software systems, and studies on programming education and curriculum development. The journal is published in January, April, July, and October.

Reviewers evaluate submissions based on originality, clarity of presentation, and contribution to the field or body of knowledge. This journal publishes research articles, review articles (including literature reviews), case reports, and concept or policy articles covering areas such as algorithm design and complexity analysis, data structures and optimization techniques, programming paradigms and languages, computational thinking, and parallel and distributed algorithms. Submitted articles must be original works that have not been previously published. All submissions undergo review by a team comprising both internal and external reviewers.

The Editorial Board is committed to continuously improving the journal's quality so that it may serve as a significant reference in the advancement of the field. We extend our deepest appreciation and gratitude to the peer reviewers, Editorial Board members, and all parties involved in the publication of this journal.

Sincerely,

Editor-in-Chief

PROGRAMMING AND ALGORITHM FUNDAMENTALS

VOLUME 1 NO 1 JANUARY 2026

LIST OF CONTENTS

Journal Focus, Scope, and Indexing Information I
Editorial Team II
Foreword III
List of contents IV

Design and Analysis of a Novel Parallel Algorithm for Large Scale Graph Optimization with Dynamic Load Balancing in Heterogeneous Computing Environments **Hal 01-10**
Dedy Tri Cahyono, Jaja Miharja

Integrating Computational Thinking and Adaptive Curriculum Frameworks to Enhance Problem Solving Skills in Undergraduate Programming Education Across Diverse Learning Contexts **Hal 11-21**
Nicodemus Rahanra, Ahmad Ashifuddin Aqham, Eko Siswanto

A Hybrid Data Structure and Algorithmic Approach for Efficient Memory Management and Query Processing in High Performance Software Systems **Hal 22-33**
Zulfikar Zulfikar, Febri Adi Prasetya, Marsiska Ariesta Putri

Comparative Evaluation of Functional, Object Oriented, and Declarative Programming Paradigms for Scalability and Maintainability in Distributed Data Processing Applications **Hal 34-46**
Simon Simarmata, Panser Karo karo

Complexity Analysis of Adaptive Scheduling Algorithms for Real Time Parallel Processing in Cloud Computing Platforms with Fault Tolerance Mechanisms **Hal 47-58**
Warto Warto, Iif Alfiatul Mukaromah
