SOFTWARE ENGINEERING IN COMPUTING SYSTEMS

VOLUME 1 NO 1 FEBRUARY 2026

FOKUS DAN RUANG LINGKUP JURNAL

Software Engineering in Computing Systems is a peer-reviewed academic journal that aims to advance research in software engineering practices and methodologies for the development of reliable, secure, and scalable computing systems, covering topics such as software architecture and system design, software development methodologies, software testing, verification and validation, DevOps and continuous integration and deployment, software engineering for embedded and real-time systems, secure and dependable software systems, as well as software maintenance and evolution. The journal is published in **February, May, August, and November.**

Articles published in **Software Engineering in Computing Systems** consist of original scientific research findings (top priority), novel scientific review articles (lower priority), or commentaries/critiques regarding existing publications. The journal accepts manuscripts or articles in the fields of software architecture, system design, and software development methodology.

Articles featured in **Software Engineering in Computing Systems** have undergone a peer-review process. The journal accepts only original research findings (top priority) and novel scientific review articles (lower priority). The decision regarding the acceptance or rejection of a scientific article rests with the Editorial Board, based on recommendations from peer reviewers.

JOURNAL INDEXING INFORMATION

Software Engineering in Computing Systems (E-ISSN: 3124-006 https://journal.apjikom.or.id/index.php/SECONS) is a peer-reviewed journal slated for indexing in several reputable databases, including Google Scholar, Garda Rujukan Digital (GARUDA), Copernicus, Dimensions, Connecting Research and Researchers (ORCID), and DOI Crossref.

SOFTWARE ENGINEERING IN COMPUTING SYSTEMS

VOLUME 1 NO 1 FEBRUARY 2026

PREFACE

Software Engineering in Computing Systems is a peer-reviewed academic journal that aims to advance research in software engineering practices and methodologies for the development of reliable, secure, and scalable computing systems, covering topics such as software architecture and system design, software development methodologies, software testing, verification and validation, DevOps and continuous integration and deployment, software engineering for embedded and real-time systems, secure and dependable software systems, as well as software maintenance and evolution. The journal is published in February, May, August, and November.

Reviewers evaluate submissions based on originality, clarity of presentation, and contribution to the field or body of knowledge. This journal publishes research articles, review articles (including literature reviews), case reports, and concept or policy articles covering areas such as systems, software development methodologies, software testing, verification and validation, and DevOps and integration. Submitted articles must be original works that have not been previously published. All submissions undergo review by a team comprising both internal and external reviewers.

The Editorial Board is committed to continuously improving the journal's quality so that it may serve as a significant reference in the advancement of the field. We extend our deepest appreciation and gratitude to the peer reviewers, Editorial Board members, and all parties involved in the publication of this journal.

Sincerely,

Editor-in-Chief

SOFTWARE ENGINEERING IN COMPUTING SYSTEMS

VOLUME 1 NO 1 FEBRUARY 2026

LIST OF CONTENTS

Journal Focus, Scope, and Indexing Information I
Editorial Team II
Foreword III
List of contents IV

Evaluating the Impact of Model Driven Development on Verification and Validation Efficiency in Secure, Large Scale Enterprise Software Systems **Hal 01-10**
Sandy Suryady, Siska Narulita, Amna Amna

Framework for Integrating Continuous Integration and Continuous Deployment (CI or CD) with Automated Security Testing to Improve Software Dependability **Hal 11-21**
Syaiful Anwar, Irwanto Irwanto, Safrizal Safrizal

Empirical Analysis of Design Patterns, Modular Architecture, and Maintainability in Distributed Real Time Computing Systems under Agile Development Practices **Hal 22-32**
Agustinus Budi Santoso, Febryantahanuji Febryantahanuji, Atiek Nurindriani, Robiatul Adawiyah

Adaptive DevOps Practices for Enhancing Reliability and Performance of Embedded Computing Platforms in Safety Critical Industrial Applications **Hal 33-42**
Deasy Widyastomo, Yosef Lefaan, Irlon Irlon

A Comparative Study of Software Testing Techniques and Quality Metrics for Predicting Failure Rates in Scalable Cloud Native Software Systems **Hal 43-54**
Winny Purbaratri, Mujito Mujito, Sayyid Jamal Al Din
